Instructions:

Step 1: Type the data table (5 minutes)

Type the following data into MS Excel, starting from cell A1.
Bengaluru – Monthly Mean Rainfall

Month	Mean Rainfall (mm)
January	1.8
February	7.2
March	16.5
April	46.9
May	119.6
June	106.5
July	113.5
August	162.7
September	208.3
October	168.3
November	48.9
December	15.7

(Note: These are practice values for the activity, not a verified complete transcription of the IMD climate table)

Step 2: Analyse the data (3 minutes)

Answer these questions using the table.

1. Which month has the highest mean rainfall?
2. Which month has the lowest mean rainfall?
3. In which month does the rainfall increase the most compared with the previous month?
4. What happens to rainfall after September?

Step 3: Create a Line Chart (7 minutes)

1. Select the complete data table, including headings.
2. Click the Insert tab.
3. Select Insert Line or Area Chart.
4. Choose 2-D Line with Markers.
5. Move or resize the chart so that it is clearly visible.

Step 4: Format the chart (7 minutes)

Apply the following formatting:

Chart Element	Required Format
Chart Title	Mean Monthly Rainfall in Bengaluru
Horizontal Axis Title	Month
Vertical Axis Title	Mean Rainfall (mm)
Data Labels	Show the rainfall values
Chart Style	Choose a suitable style
Chart Size	Resize for clear visibility
